

MANISH N REDDY

Data Analyst | Reporting & Business Intelligence

Bangalore, India • +91-9590555666 • manishnreddy99@gmail.com

[LinkedIn](#) • [SQL Projects Repo](#)

PROFESSIONAL SUMMARY

Data Analyst with 2+ years of professional experience in software quality engineering at a SaaS company, complemented by hands-on analytics training and project work in SQL, Excel, Python, and BI tools. Transitioned into data analytics in 2024 to pursue a stronger focus on business insights and reporting. Experienced in data validation, KPI tracking, dashboard development, and translating business requirements into analytical solutions. Seeking a data analyst or BI analyst role where I can apply both technical rigor and business understanding to drive data-driven decisions.

SKILLS

SQL & Data Analysis: Joins, Aggregations (GROUP BY, HAVING), Subqueries, CTEs, Window Functions, Data Cleaning

Excel: Pivot Tables, Power Query, VLOOKUP/XLOOKUP, Dashboarding

BI Tools: Power BI, Tableau – KPI dashboards, drill-down analysis, reporting

Python: Pandas, NumPy, Matplotlib/Seaborn, EDA, Data Cleaning, API & File Ingestion

Statistics: Hypothesis Testing, A/B Testing, Correlation, Basic Regression, Time Series Basics

Business Analysis: KPI tracking, trend analysis, root cause analysis, data validation, reporting

Tools: MySQL, MS SQL Server, Git, Jupyter Notebook

PROJECT PORTFOLIO

Full project code and dashboards available at github.com/manishnreddy/SQL-Hands-on-1

Retail Store Performance & Sales Analytics | SQL, Excel, Tableau

- Analysed **25,000+** sales transactions to evaluate revenue contribution, store performance, product demand, and seasonal trends.
- Built SQL queries using CTEs, window functions, and aggregations to compute key business KPIs including total revenue, AOV, MoM growth, and inventory turnover.
- Identified top-performing store locations contributing **~38% of total revenue**; uncovered category-level demand patterns to support inventory and sales planning.
- Developed interactive Tableau and Excel dashboards to track store-wise performance, category trends, and revenue KPIs for data-driven decision-making.

Hospital Management System Analytics | SQL, Python, Tableau

- Analysed **7,000+** patient, appointment, and doctor workload records to improve hospital operations and resource allocation.
- Ranked doctors by workload, identifying the **top 10 overburdened practitioners responsible for 55%+** of total appointment volume — enabling targeted scheduling improvements.
- Performed SQL-driven root cause analysis on appointment cancellations (**~12%**), segmenting by timing, patient type, and department to surface actionable bottlenecks.

- Built Tableau dashboards visualising patient flow, doctor utilisation, appointment bottlenecks, and service gaps to support admin decision-making.
- Applied EDA and statistical analysis to identify no-show patterns and peak-hour demand, contributing to a **15% improvement in slot availability**.

PROFESSIONAL EXPERIENCE

Learnbay – Bangalore, India – Data Analyst Intern

Sep 2025 – Present

- Designed end-to-end analytics workflows using SQL, Excel, Python, and Tableau to extract KPIs, identify trends, and deliver actionable business insights from 7,000+ and 25,000+ record datasets.
- Built SQL-based data models using CTEs and window functions to compute key business metrics (revenue, AOV, MoM growth, appointment patterns), enabling performance benchmarking and resource planning.
- Performed root cause analysis and exploratory data analysis to surface bottlenecks and improvement opportunities, supporting a 15% improvement in operational metrics.

Loconav India Private Limited – Gurugram, India

Software Development Engineer in Test

Mar 2022 – Apr 2024

- Performed functional, regression, and exploratory testing across web, Android, and iOS applications to validate business workflows and system behavior; reduced defect escape by identifying critical issues before release.
- Analysed structured and semi-structured application data, logs, and test results to ensure data accuracy, completeness, and reporting reliability across 500+ test cases per release cycle.
- Built and maintained Excel-based trackers and reports for test execution, defects, and quality metrics; performed trend and root cause analysis to support release decisions.
- Validated API responses and backend data consistency across environments, ensuring data integrity across reporting pipelines.
- Independently managed end-to-end QA activities for Android application releases including validation, defect tracking, regression testing, and release sign-off coordination.
- Collaborated cross-functionally with Product, Engineering, and Operations teams to translate business scenarios into validation logic.

EDUCATION & PROFESSIONAL UPSKILLING

B.E. in Electronics & Communication Engineering

2017 – 2021

AMC Engineering College, Bangalore

Data Science & Generative AI – Master's Program

2024 – 2025

Learnbay, Bangalore | IBM Certified

Made a planned transition from software quality engineering into data analytics in 2024, investing in full-time upskilling to build a strong foundation before pursuing analyst roles.

CERTIFICATIONS

Data Science & Generative AI Master's Certification – IBM
